Date : August 9, 2011

Jeff mentioned in [this prior post](#) that [S.L. 2011-12](#) created three new drug trafficking crimes—trafficking in MDPV, mephedrone, and synthetic cannabinoids. I have incorporated those new crimes (effective for offenses committed on or after June 1, 2011) into my tabular summary of the drug trafficking law, available [here](#). The front page of the chart includes a brief summary of the sentencing rules for trafficking (including conspiracies and attempts), and a recap of the law on substantial assistance.
